OCTOBER 19-22, 2022

Introduction & Guidelines

The American Psychiatric Nurses Association (APNA) will hold its 36th Annual Conference on October 19-22, 2022. The APNA Annual Conference attracts 1,200-2,000* attendees who influence or deliver care to patients across the lifespan and in a variety of settings – including outpatient, community, inpatient hospital, and academic settings. This program will be offered in-person with virtual components pending CDC and state safety guidelines and requirements.**

The mission of APNA is to advance the science and education of psychiatric-mental health nursing. APNA is committed to the practice of psychiatric-mental health nursing, health, wellness and recovery promotion through identification of mental health issues, prevention of mental health problems and the care and treatment of persons with psychiatric disorders. Our vision is that APNA will be a leader in transforming mental health care in the nation.

In fulfillment of this mission, APNA has established goals that relate directly to the education of psychiatric-mental health nurses. It is with your help that APNA can effectively meet the needs of the mental health community through educational programs.

A sponsored educational symposium is defined as: *A scientific program developed for educational purposes*. All programs must be in compliance with federal and state laws that regulate the marketing and promotion of reimbursable health care products. Attendance must be open to all APNA conference registrants. There are no other APNA sessions held during scheduled symposium timeslots, providing exclusivity for each symposium.

Registration & Provision of Contact Hours

Registration is hosted through APNA's conference registration website at no additional cost, provided that the activity is scheduled prior to opening the online registration in June 2022*. An approved title, short description and name of faculty chair must be submitted for online registration.

It is the responsibility of the sponsoring company to request registration numbers prior to the program.

Contact hours must be provided for the symposium through an organization accredited by ANCC or an organization that meets ANCC criteria (eg ACCME, ACPE; for a complete list, see the ANCC website). Nursing Continuing Professional Development Policy on Full Disclosure

The American Psychiatric Nurses Association requires disclosure to the audience of the existence of any significant financial interest or affiliation that a faculty member has with any commercial supporter of the activity and/or with the manufacturer(s) of any commercial product(s) and/or provider(s) of any commercial service(s) discussed in an educational presentation.

The existence of such relationships does not necessarily constitute a conflict of interest, but the prospective audience must be informed of the faculty member's affiliation with a commercial sponsor by way of an acknowledgement in the printed program or syllabus.

This policy is intended to openly identify any potential conflict so that members of the audiences in an educational activity are able to form their own judgment about the presentation.

A reasonable test to guide decisions about what to disclose is whether any particular affiliation could cause embarrassment to the individual or institution involved, or lead to questions about the faculty member's motives, if such affiliation(s) were made known to the general public.

Glossary of Terms

Commercial Interest - ANCC defines an entity that has a "commercial interest" as any proprietary entity producing health care goods or services, with the exception of non-profit or government organizations.

Financial relationships - ANCC defines "financial relationships" as those relationships in which the individual benefits by receiving a salary, royalty, intellectual property rights, consulting fee, honoraria, ownership interest (e.g., stocks, stock options, or other ownership interest, excluding diversified mutual funds), or other financial benefit. Financial relationships can also include 'contracted research' where the institution gets the grant and manages the funds and the individual is the principal or named investigator on the grant. Financial benefits are usually associated with roles such as employment, management position, independent contractor (including contracted research), consulting, speaking and teaching, membership on advisory committees or review panels, board membership, and other activities from which remuneration is received, or expected. ANCC considers relationships of the person involved in the NCPD activity to include financial relationships of a family member.

Relevant financial relationships - ANCC considers financial relationships in any amount occurring within the past 12 months as "relevant" in terms of creating a conflict of interest.

Conflict of Interest - ANCC defines a "conflict of interest" as when an individual has an opportunity to affect NCPD content with products or services from a commercial interest with which he/she has a financial relationship. ANCC considers "opportunity to affect NCPD content" to include content about specific agents/devices, but not necessarily about the class of agents/devices, and not necessarily content about the whole disease class in which those agents/devices are used.

Off label - "Using products for a purpose other than that for which it was approved by the Food and Drug Administration (FDA)."
